The Riley RM Centre Ltd Information

The Riley RM Centre Ltd has been established with the sole ambition to provide members with parts required for the RM series cars A – H and other Marques with Riley engines on the road, enabling owners to enjoy "magnificent motoring" for many years to come. Many of the parts have been commissioned for re-manufacture to original designs by the Spares Advisory Panel and are only available via the Centre.

You are more than welcome to visit the spares centre; please call to arrange but please note you may be given a task!

All spares are listed with photographs, descriptions and fitting instructions on the Spares Centre website: www.therileyrmcentre.co.uk (registration is required before purchase).

Note: prices are correct at the time of printing but are liable to change without notice due to restocking price increases. Parts may also go out of stock either temporarily or permanently.

Spares Ordering

Spares are able to be ordered via the following channels:

Internet - www.therileyrmcentre.co.uk
Email - spares.sec@rileyrmclub.org.uk
Post - to address below
Telephone 01763 281336 (simple/urgent orders only 3 - 4.30pm Mon-Fri).

All orders must include the following information:

Full name, membership number, car details, delivery and invoice address, Riley RM Centre Spares List part number, quantity required.

Should you need technical advice relating to spares please make contact with our wonderful team of technical advisors as detailed on the inside front cover of R. Memoranda magazine. Please note: a 10% restocking charge applies to all correctly supplied parts returned for credit within 12 months of invoice unless returned within 14 days of receipt. Please note full payment is due on receipt of goods.

Payment methods

Payment can be made by the following methods on receipt of your goods:

- 1. Bank transfer (internet banking): please use your name / membership number as the reference. Full details are on the reverse of the feedback slip enclosed with your order.
- 2. Cheque: please add the invoice number and your membership number to the back of your cheque. Make cheques payable to The Riley RM Centre Ltd.
- 3. Credit / Debit card: we can accept card payments for all orders from members. Please telephone 01763 281336 between 3 4.30pm weekdays or send by either fax or letter your card's 16 digit number, the expiry date of the card and the 3 digit security number from the back; we will also need the house number and post code of the address where the card is registered.

Please do not send your card details by email or a combination of emails. We are not permitted to retain your card details due to data protection regulations (PCI DSS).

4. Cash payment: only available at the National rally.

Orders for under £200.00 (less VAT and shipping) will be sent out on receipt; orders for over this amount should be accompanied by a 50% deposit. Please do not send a cheque in advance for an order of less than £200.00 as it will almost certainly result in your having to send another cheque as shipping costs cannot be accurately determined until the consignment is packed. Please pay on receipt of the invoice, also note that you are fully responsible for payments for parts which are ordered in your name by and sent to your repairer, whatever arrangement you have with your third party.

Prompt payment is appreciated; if payment for previous orders has not yet been received, further orders will not be able to be processed.

Please note full payment is due on receipt of goods.

Part Numbers

The part numbers are where possible generated from combining the illustration number and page number in the Workshop Manual, so part A4.59 is marked as part 59 in the diagram on page A4. This part is common to 1½ & a 2½ but takes its number from the early 2½ Engine section simply because that is the first place the part is shown.

Some parts are not listed in this way (RM, WB, SS or SB) so please check the spares list for the correct part number required. Of course not all parts shown in the Workshop Manual are available. Please make me aware of any item that is not listed to enable me to gauge the demand and hence potentially manufacture in the future. Note: numbers used in the original Riley Parts Lists are not cross-referenced so please do not use them.

Contact Details

Email address - spares.sec@rileyrmclub.org.uk
The Riley RM Centre Ltd, Unit 6, Cumberlow Green Farm, Rushden Road, Rushden, Buntingford, Herts, SG9 0QD
Telephone number - between 3 and 4.30pm

01763 281336 within the UK, or +44 1763 281336 from outside the UK

Supplying alternative delivery addresses or a third party

The Riley RM Centre Ltd is legally obliged to supply spares only to fully paid up members of the Riley RM Club for their own use and not for resale or redistribution. We will gladly address consignments to a third party following your instruction, usually your garage or restoration company, but you must indicate on each order where the delivery address will be; the default address will be your magazine delivery address. You the member are liable for any payments for any spares ordered in your name, despite any arrangements that you may have in place with your repairer.

Postage and shipping
All parts are shipped at the best possible 2nd class price, you may specify at extra cost an urgent next day delivery. Most orders weighing less than 2kg are sent via the Post Office counter service; this service is not able to be tracked. This standard service is also the most cost effective method for most sub 2kg overseas shipments. For heavier, higher value or bulkier parcels a courier will be used. A collection service is available from the spares centre by prior appointment.

Guarantee and Exchange Policy

All new parts are guaranteed for a period of 12 calendar months from the invoice date. All refurbished items are guaranteed for a period of 90 days from the invoice date It is the responsibility of the purchaser to inspect the item on receipt to ascertain its suitability. Due to the reducing number of suitable old units for reconditioning, clutches must be returned before dispatch of the replacement units that are normally on the shelf ready for dispatch. It is a similar situation with control boxes, starter motors and dynamos. Please contact for full details.

Value Added Tax

VAT is applied at the current rate of 20% rate to sales sent to all UK countries or collected from the Spares Centre and/or National Rally, even if the member is resident outside the UK. It is then for the member to make any reclaim when leaving the UK.

The Copyright of this spares list and price list belongs to the Riley RM Club and it must not be copied, transmitted or displayed without written permission of The Riley RM Club committee

The Riley RM Centre Ltd Returns Policy

UK Returns Policy

We promise to refund cost of goods and delivery postage (where all items of an order are returned) any not fitted, unused item you are not completely happy with when you return it to us in saleable condition by post within 14 days of receipt, or in person to the Riley RM Centre within 1 month of receipt. You are required to return unwanted orders at your own cost.

Returned parcels are on average refunded within 14 days of posting, however in the event of a delay in receiving the parcel this may take up to a maximum of 28 days. Refunds will be credited to your account or original method of payment.

Please note that items must be returned with the original packaging and box (if supplied boxed). If the returned product forms part of a larger order only the product cost will be refunded.

Your statutory rights are not affected by our returns policy.

International Returns Policy

We promise to refund cost of goods and delivery postage (where all items of an order are returned), If the returned product forms part of a larger order only the product cost will be refunded. Any item purchased on our website or by email / telephone that you are not completely happy with when you return it to us in a saleable condition by post within 14 days of receipt. You are required to return unwanted orders at your own cost. Please note that items must be returned with the original packaging and box (if supplied boxed). If the returned product forms part of a larger order only the product cost will be refunded. Refunds will be credited to your account or by original method of payment.

Returns By Post (All Countries)

You can return an item by post within 14 days of receipt. Members are required to return unwanted orders at their own cost.

Please allow 28 days from the day the parcel is posted for your refund to be processed. We will email you to let you know once your refund has been processed.

The refund will be processed once your goods are received at the spares Centre. Please note that it may take 7-10 working days for the refund to show in your account. Each item returned is refunded separately and will show on your statement as a credit. If goods were paid by Credit / Debit card and you wish the credit to be refunded on to the card that the goods were purchased with, Please contact The Riley RM Centre Ltd to arrange the transaction with your order number and membership number. If your card expires before we process your refund, please contact The Riley RM Centre Ltd spares team with your new card details.

NOTES

Please note this is an applications table for reference only, For availability of parts please refer to the brakes section of this spares and price list.

Note I Brake spring No GB41656 is fitted up to chassis No RMH3965

INSTRUCTIONS AND TIPS FOR FITTING ITEMS IN BODY REPAIR SECTIONS SEE P. 20

RM238 L&R STRIKER RECESS REPAIR PANEL. This panel requires cropping to match the inner flange of the original, and the outer flange to lap over the surviving steel of the screen panel for leading. The striker plate is to be assembled into the lock dovetail and the panel vertical-centre marked to coincide with the centre of the striker plate. The vertical position of the panel can then be marked on the car, the panel positioning and the striker 3/8" holes cutting to suit door closure.

The upper and lower cappings are not available and require making by hand to suit the car.

RM103 L&R C-POST REPAIR PANEL. These require cutting to width or length as necessary and finishing with a part of the wing root including the 5/16 BSF captive nut.

RM139 L&R REAR WINGS: As supplied, no mounting or fuel filler pipe holes have been cut in these panels. The filler holes can be cut by use of a tank cutter after careful positioning the centre of the hole compared with an original wing.

RM141,142 RUNNING BOARDS. This panel should be compared with its front wing, and the height profile at the interface, if different from the wing, altered to suit by cutting horizontally about 1½" above the wired edge for a distance of about 9", closing and re-welding followed by fettling and polishing the surface.

FRONT APRON (NUMBER PLATE) PANEL, RM 117. This panel comes complete with bracket to rear.

RM269 ROOF EDGE, OR UNDER REAR WINDOW STRIP. For the roof edge, the strip requires cutting in two near the middle, curving to profile, and welding to a new or reclaimed capping piece before grinding the excess weld. It requires drilling for screws or nails.

For the strip beneath the rear window the 90° angle requires opening to suit the profile of the car structure before straining to curve by hand, and drilling.

RM268 SPARE WHEEL COMPARTMENT FLOOR REPAIR SECTION. Both ends require cutting to fold the side tabs. The original floor is to be cut on the 'waste' side of the line where the swages meet the flat metal of the floor, and at the sides; the panel will then meet that cut and those at the sides before butt-welding, grinding and polishing smooth.

RM276 RME2 OUTER SILL CAPPING PANEL. This is supplied as a straight-folded over-length channel which requires straining in two dimensions to curve to match the-curves on the sill inner filler blocks WB3I-32 L or R. It *MUST NOT* be cut to assist with the curving operation.

RM273 SCREEN PANEL REPAIR SECTION. This panel is supplied over-length to enable free-hand bending to the original curve. It requires cutting and mitring in the CENTRE before straining to the correct profile by hand. The end off-cuts can be used to repair the panel at the sides.

RM1002 WING EDGE GUTTER REPAIR SECTION. This part is not suitable for RME2 rear wings. This strip is supplied over-length to be strained to curve to meet the wired edge of the wing, leaving a gap of ¾" at the rear for drainage.

RM1003 DOOR BOTTOM SEALING STRIPS. Steel angle strips for later cars, to be used where the door has been rebated to accommodate the strip.

The strips are supplied over-length to enable the front strips to be curved to profile by hand. They need to be cut to length, drilled, deburred and the ends radiused before painting.

Thanks are due to Roger Lamb for these helpful notes.

ADDITIONAL INFORMATION – SUPPLIERS

This may be an appropriate place to reflect on some aspects of our spares pricing policy. It is not difficult to find some items for sale at prices cheaper than we offer. This does not dismay us; we all like a bargain.

But take a moment to ask yourself - how much does the eBay retailer or autojumbler from whom you bought your cheaper item contribute towards the commissioning, designing, manufacturing, and procurement of the items specific to RM Rileys? How much did they contribute towards the new batch of RMB halfshafts the Club has recently had made? How likely are they to manufacture new exhaust manifolds, realising that a shortage means that some cars could conceivably be kept off the road in future for want of such a part?

The policy at The Riley RM Centre Ltd is to only make sufficient operating profit to keep running, to have sufficient funds to enable the procurement and if necessary manufacture of items vital to the continued use of our lovely RM series cars. We do not need to make a profit for shareholders. Not wishing for Healey owners to be left out, we also take pride in being able to supply those lucky enough to enjoy Riley-powered Healey motoring as well. So the next time you feel the pain when paying (immediately on receipt!) your invoice from The Riley RM Centre Ltd, please feel also a sense of pride at contributing to the cars' survival as we enjoy Magnificent Motoring..
